

How do I close a job when I receive a job entry is being reallocated error?

1. Go into the job re-allocation window, search for the job that is mentioned in the error message and search by the job and the entry number
2. Click on the job in question
3. Go into the table part of the window, Right click on the entry. Go to **Index > Delete job re-allocation entry**
4. Hit **OK**
5. Try and close the job
6. You may still get this error but it may reference a different line, Repeat steps above until error message disappears and job can close.
