### **AnalytiX Dashboard Builder**

Maintaining consistent views of the business throughout an organization can be a challenging task. Everyone needs information he or she can use to focus on accomplishing the organizational goals. Dashboard Builder provides relevant analytics to everyone in your company who needs to understand business activities.

Dashboard Builder provides instant insight into your business activities by allowing you to display your business intelligence content in one consolidated dashboard view. You can display the reports and analytics that are most relevant for business users. By providing a consistent view of the business, employees are empowered to make the right decisions for the company and hence, improve overall business performance.

### **Product Capabilities**

- Dashboard building capabilities for designing personal dashboards
- Universe-based analytic templates (this includes those built using AnalytiX Xcelsius technology)

### **Prerequisite**

- Maconomy AnalytiX Business Intelligence
- If a client creates their own custom analytics with AnalytiX Xcelsius and displays them in Dashboard Builder dashboards, the client will need AnalytiX Xcelsius licenses to display these custom analytics.

Licenses are sold in pre-defined bundles. A combination of the bundles is possible.

The Maconomy AnalytiX Dashboard Builder is based on the BusinessObjects Dashboard Builder.

This product is only supported on Windows.

## imagine

...ensuring that daily management and decision-making are based on facts

### AnalytiX Xcelsius

AnalytiX Xcelsius allows users to create interactive visual analytics. It includes all of the interactive model design capabilities, plus the ability to create "connected" models, which dynamically refresh from Maconomy AnalytiX Business Intelligence. Additionally, AnalytiX Xcelsius includes integration with Microsoft SharePoint to allow end users to view and personalize Xcelsius models right from within the SharePoint portal.

The Xcelsius models may be hosted on a web server, within InfoView, or within AnalytiX Dashboard Builder. They may also be delivered as part of an Office document, Adobe PDF, etc. Regardless of the delivery method, these models are connected to the data source and can be refreshed while viewing. Connectivity to the data source is done via XML, web services, or Live Office and QaaWS.

### Product Capabilities

- Xcelsius model designer with basic components and functionality
- Build models based on Microsoft Excel spreadsheets
- Export to Microsoft PowerPoint
- Unique data displays (e.g., ticker component, dynamic picture show visualization)
- Connectivity to AnalytiX data source via XML, web services, Live Office or Query as a Web Service (QaaWS)
- Ability to create dynamic refreshable Xcelsius models using XML, web services, and/or Live Office
- Advanced integration with Microsoft SharePoint and Reporting Services
- Ability to create dynamic refreshable Xcelsius models connected to Maconomy AnalytiX using Query as a Web Service and/or Live Office
- View live refreshable Xcelsius analytic models

### Prerequisite

- Maconomy AnalytiX Business Intelligence

Licenses are sold in pre-defined bundles. A combination of the bundles is possible.

Maconomy AnalytiX Xcelsius is based on Business Objects Xcelsius Enterprise and BusinessObjects Xcelsius Enterprise Interactive Viewing.

This product is only supported on Windows.

### **AnalytiX Live Office**

AnalytiX Live Office can help you end time-consuming debates over data accuracy. Use credible, IT-verified information that is based on existing corporate reports. Instant refreshing and re-filtering puts the most accurate, up-to-date data at your fingertips for more confident decisions. Moreover, all formatting and calculations are retained.

Live Office lets you easily access your corporate data from within Microsoft Office without depending on IT. Save time by connecting to one centralized system for all your data. Right within Microsoft Office, you can use intuitive wizards and tool bars to easily connect to and select data from a Crystal report, Web Intelligence document, or via ad hoc data selections. Then format your data using familiar Office tools.

### **Prerequisite**

- Maconomy AnalytiX Reporting

Licenses are sold in pre-defined bundles. A combination of the bundles is possible. Maconomy AnalytiX Live Office is based on the BusinessObjects Live Office.

This product is only supported on Windows.

### **Additional Data Sources**

A Maconomy AnalytiX Reporting license allows you to report on Maconomy data only. With Additional Data Sources you are allowed to use a limited amount of data from other systems than Maconomy with your Maconomy AnalytiX solution. Consequently, you can combine Maconomy data with aggregated numbers from other systems in your reports and analyses. This will add additional value to your business.

### **Prerequisite**

- Maconomy AnalytiX Reporting.

Licenses allow access to one, two or three additional data sources with a maximum of 25 fields in total

## organic business solutions
